DETAILED ACTION

Response to Amendment

The preliminary amendment has been entered. Original claim 1 has been cancelled in favor of new claims 14 and 15. Claims 2-15 are subject to examination herein.

Allowable Subject Matter

Claims 2-15 are allowed.

With regards to claims 14 and 15, the closest prior art, Saotome (US 5,038,037) and Itakura (US 5,365,076), teach a radiation readout apparatus comprising a plurality of image converter panels superposed on one another, a separator which separate the converter panels and a detecting head. Prior art fails to teach or suggest the specific requirements with regards to the separator, namely that the separator separates the image converter panel by rotating about an axis on a plane parallel to the surfaces of the radiation image converter panels relatively to the others.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Saotome (US 5,038,037) and Itakura (US 5,365,076) teach a radiation image recording and readout apparatus.
